

## Exception Based Reporting Point of Sale Analysis

Significant losses in retail occur at the point of sale (POS). Incidents related to employee theft, error and compliance have a significant impact on shrink. Early resolution and correction are vital to loss reduction and improved operational controls.

If you don't have the knowledge or expertise in system usage, detecting and resolving exceptions can be a challenge. A common issue retailers face, is not having the resources to data mine, sift, and analyze thousands of rows of transactions. Our professionals know how to locate those loss identifiers quickly.
